All Hoists Are Not REcreated Equally

Don’t be fooled. There are a lot of imitators out there but only one Spider. Many have attempted to replicate our ST-17 work basket, but copy cats don’t come close to the original. Protect your interests by educating yourself before you buy or rent. Here are a few things that make Spider’s ST-17 the one and only... Don’t settle for anything less than the original Spider ST-17 work basket.

Fact: The Spider ST-17 is THE invention that started the powered access industry in the 1940s, forever changing the way work at high elevations is accessed.

Fact: Production of the ST-17 has been steady since the 1940s, deeming the production of this hoist the longest running in the industry.

Fact: Only Spider's drum hoists are UL listed.

Fact: Spider’s 25 operation centers in the Americas are the only locations where hoists are repaired using a 116 point checklist and genuine OEM (original equipment manufacturer) parts by factory-trained qualified technicians working under expert supervision.

Fact: Spider utilizes a coordinate measuring machine that verifies production standards for the close tolerance mechanical components of our hoists, so you can be certain every part has met exacting specifications. UL employees personally inspect our production regularly to assure compliance to the tested product UL listed for safety and reliability. See why UL matters below.

Fact: Several ST-17s that were produced over fifty years ago, including our serial number TA-0112 built in 1950, are still in our rental fleet today. That’s how we define reliability.

Fact: Over the past 65 years, Spider has continuously updated, improved and modified the ST-17 model to improve ease of use and serviceability and to meet current regulation requirements.

Fact: Spider’s ST-17 and the work our factory-trained certified technicians perform is backed by the strongest liability insurance in the industry - $21 million in coverage by A15+ rated AIG.

Spider invests in UL and CUL Certification for your Safety

Spider designs, engineers, builds and tests its hoists in accordance with the Underwriters Laboratories UL1323 standard for hoists as required by OSHA under OSHA 1910.28(d)(1)(i) & (g)(3) and 1926.451(d)(13). Employers are required under OSHA to use hoists tested by both a Nationally Recognized Testing Laboratory and a Qualified Testing Laboratory, depending on which code section applies. Underwriters Laboratory (UL) is one of three nationally Recognized Testing Laboratories accredited to test to the UL1323 standard.

Spider makes the choice to list its hoists with UL® because it provides Spider equipment users equipment that is safer than products listed by other labs. This gives Spider customers peace of mind. UL® interprets the UL1323 test standard with the intent from which this code was written and rigorously applies the UL1323 code to its initial performance testing protocol and its ongoing certification program.

Not all manufacturers invest in UL listing. Our hoists are UL® listed. To verify the listing status, visit www.UL.com, choose Certifications, and enter SafeWorks as the company name. Choose TUFP-SA5062 to see that SafeWorks earned its UL Classification and continues to maintain this listing.

Examiners employed by Underwriters Laboratories regularly inspect our hoists during production in our factories to verify consistent sustained production of the products as designed and originally tested and listed. This drives a safer, more reliable product for our users.
